Instantly update any space with bold colour and layers of pattern and texture

### BEFORE

This cookie-cutter room lacked colour and texture, and there was no focal point.

### Accessorize!

Use a combination of drapes, throw cushions, bolsters, throws, spreads and area rugs to add lush layers, soften up the overall look – and muffle sounds in echoey condos. Accessories also create a mood that's both practical and luxurious. An open-backed chair lets light in while taking up less visual space.

**TIP:** When choosing a floor rug, make sure it's large enough to extend past the sides and end of the bed.

**BEFORE**  
Vertical blinds looked generic. A massive chair felt out of scale and too masculine.

**Install dimmers.**

Vary your lighting to create an intimate, sophisticated space. Place the main overhead light on a dimmer to make changing the mood easy. Then add wall sconces or table lamps on either side of the bed for late-night reading. Complete the look with a lamp on the dresser.

**Mismatch your night tables.**

Take your time to find just the right piece of furniture, rather than buying an entire bedroom set all at once. Instead of looking like a showroom, your bedroom will feel like a true reflection of your personality.
